

2016 Human Rights Due Diligence Workshop (Stakeholder Engagement Programme)

December 15th, 2016

“Human Rights Issues by Sector v.5” and “Priorities on the SDGs by Sector”

In September 2012, Caux Round Table Japan (CRT Japan) established a Nippon CSR Consortium as a platform for multi-stakeholders in cooperation with companies, NGO/NPO and academic experts. The Consortium organizes a yearly Human Rights Due Diligence Workshop where multi-stakeholders come together to discuss the relationship between business activities and human rights

A 2016 Human Rights Due Diligence Workshop, which marked as the fifth year, was held six times in the period from 15th June to 27 July. The participants identified sector specific human rights issues with the use of Human Rights Guidance Tool developed by UNEP FI, and identified priorities on the Sustainable Development Goals (SDGs) by sector with the use of SDG Compass while considering SDGs and proposals for the SDGs submitted by NGOs/NPOs in the G7 Ise-Shima Summit. The secretariat compiled their discussion contents and conducted public consultation on them from 30th September to 31th October. Following consideration of the received comments, the Consortium hereby releases “Human Rights Issues by Sector v.5” and “Priorities on the SDGs by Sector”. The Consortium hopes that this paper will be a useful tool for companies in promoting their human rights and SDGs activities.

Remarks in the discussion are views of the participants as individuals, not representatives of companies or organizations that they belong to, as the Chatham House Rule is applied to this program. The comments were integrated consistently to the format of this document, and the sole responsibility for the content of this document lies with CRT Japan, as an organizer of Nippon CSR Consortium.

We would like to offer our great gratitude for Ms. Kaori Nomura from UNEP Finance Initiative who provided the knowledge on Human Rights Guidance Tool, for Ms. Ikuho Miyazawa from Institute for Global Environmental Strategies who cooperated for implementation of SDG Compass into the 2016 workshop, for the participants from companies, NGO/NPO, and social entrepreneurs, and those who gave public comments.

1 Preface

1-1. Purpose of Human Rights Due Diligence Workshop

The Human Rights Due Diligence Workshop provides an opportunity for companies, NGOs/NPOs, and academic experts to conduct discussions for human rights due diligence¹ set out in the United Nations Guiding Principles on Business and Human Rights².

In July 2011, the UN Guiding Principles on Business and Human Rights were unanimously endorsed by the UN Human Rights Council. The Guiding Principles explicitly and clearly set out that all business enterprises have the responsibility to respect human rights. In order to fulfil the responsibility, the Guiding Principles require them to carry out human rights due diligence that comprises process for identifying, preventing, mitigating and accounting for how they address their adverse human rights impacts. In response to the endorsement in 2011, in cooperation with companies, NGOs/NPOs and academic experts, CRT Japan established the Nippon CSR Consortium* in 2012 as a platform for multi-stakeholders. The Consortium organizes the yearly Human Rights Due Diligence Workshop (Stakeholder Engagement Programme).

Through dialogues with companies, NGOs/NPOs, and academic experts, participants can deepen understanding of the specific contexts in which human rights violations can arise, of the relationship between business activities and human rights, of important human rights issues, and of the importance of promoting business operations with due consideration given to human rights. Discussion contents are summarized and disclosed for the purpose of obtaining public comments, which are reflected in the final report and published as “Human Rights Issues by Sector”. We believe that the Workshop helps companies to make a base essential for carrying out human rights due diligence.

¹ Human rights due diligence encompasses process for (1) identifying and assessing any actual or potential adverse human rights impacts, (2) integrating the findings from their impact assessments and take appropriate action, (3) tracking the effectiveness of their response, and (4) communicating how they address their human rights impacts.

1-2. An overview of the Previous Workshops for Identifying Human Rights Issues

In order to assist companies in implementing human rights due diligence, the Consortium conducts discussions on relationships between business activities and human rights. An overview of the past Workshops is explained as followed.

In the 2012 Workshop, sector specific human rights issues were identified based on UNEP FI Human Rights Guidance Tool³. The final report “Human Rights Issues by Sector (2013)” was released.

In 2013, the Workshop further explored “Human Rights Issues by Sector (2013)” from the perspective of value chain. It was very useful to identify human rights issues throughout value chain in understanding how each human rights issue was influenced by activities of departments. The final report “Human Rights Issues by Sector (v.2)” was released in 2013.

In 2014, to respond to the public comments received in 2013 indicating that “companies need to understand the particular context in which human rights issues arise”, the Workshop was planned and conducted. First, the participants examined 31 Global Risks outlined in World Economic Forum Report⁴ and identified 16 Global Risks which were considered to give a great influence on the sectors they belonged to. Then, they explored and identified the interconnectivities between global risks and human rights. This identification was useful for them to understand how social and environmental issues were dynamically interconnected, and understand the particular contexts in which human rights arose. The final report “Human Rights Issues by Sector (v.3)” was issued.

In 2015, the participants examined the points which should be added/removed/modified in “Human Rights Issues by Sector (v.2)” using Human Rights Guidance Tool⁵ (2014 revision) developed by UNEP FI. As the main feature of the 2015 Workshop, NGO/NPO and subject experts addressed emerging human rights issues in Japan, covering sexual minority, empowerment of women and technical intern trainees. In addition to it, the Workshop was scaled up from the 9 sectors in 2014 to the 11 sectors in 2015, examining and identifying the sector specific human rights issues. The final report “Human Rights Issues by Sector (v.4)” was issued.

The 2016 Workshop addressed the relevance between the SDGs and human rights issues. The year of 2015 marked the four significant events. At the G7 Summit in Schloss Elmau Germany, G7 leaders pledged to promote responsible supply chains, and strongly supported the UN Guiding Principles on Business and Human Rights. They also stressed the need to develop substantive National Action Plans and strengthen grievance mechanisms. At the Session of the United Nations General Assembly in September, the SDGs were adopted. In the UK, the Modern Slavery Act was adopted. And, at the UN Climate Conference in

CAUX ROUND TABLE

Paris COP 21 in December, the countries made the Paris Agreement which will come into effect in 2020. Considering all of these events, the participants identified sector specific human rights issues with the use of Human Rights Guidance Tool developed by UNEP FI, and identified priorities on the SDGs by sector with the use of SDG Compass⁶ while considering SDGs and proposals for the SDGs submitted by NGOs/NPOs in the G7 Ise-Shima Summit. The final report “Human Rights Issues by Sector (v.5)” and “Priorities on the SDGs by sector” was issued.

⁶ <http://sdgcompass.org/> (Accessed on August 15th, 2016)

1-3. Procedure of the 2016 Workshop

The Workshop consists of the following four steps.

Step1: Understanding the context in which human rights issues arise

- NGOs/NPOs, international organizations, and social entrepreneurs gave a lecture on the particular contexts in which human rights issues arose with a viewpoint of the SDGs. (Day1)

Step2: Reviewing and identifying adverse human rights impacts arising from corporate activities

- As a contributor of the Workshop, Institute for Global Environmental Strategies (IGES) was invited to present an overview of SDGs and SDG Compass⁷. Then, the participants discussed the relationship between SDGs and human rights issues across sectors using SDG Compass. (Day2)
- The participants identified the priorities on the SDGs by sector from viewpoints of positive and negative impacts through value chain, and discussed how they were related to human rights issues. They also examined the points which should be added/removed/modified in “Human Rights Issues by Sector (v.4)” using Human Rights Guidance Tool (2014 revision). (Day3/4)

Step3: Integrating perspectives from both corporations and stakeholders

- The participants summarised discussion contents and exchanged their views with NGOs/NPOs, subject experts. After receiving the feedbacks from NGOs/NPOs and subject experts, the participants finalized their discussion contents by sector. The Secretariat then compiled their work and developed “Human Rights Issues by Sector (draft)” and “Priorities on the SDGs by Sector (draft)”.

Step4: Collecting Public Comments and finalizing our report

- The Secretariat conducted public consultation on the document from September to October, 2016. Following consideration of the received comments, the secretariat released “Human Rights Issues by Sector v.5” and “Priorities on the SDGs by Sector”.

The Workshop received great support and contribution from Institute for Global Environmental Strategies for providing the introduction to SDG Compass, and from the UNEP Finance Initiative for providing the knowledge on Human Rights Guiding Tool.

⁷ http://sdgcompass.org/wp-content/uploads/2015/12/019104_SDG_Compass_Guide_2015.pdf (Accessed on August 15th, 2016)

1-4. Points for Consideration

1-4.a Differing degrees of awareness of human rights issues

The level of detail in the feedback provided by NGO and expert stakeholders was not consistent, perhaps due to differing study and priority areas. Similarly, there were gaps in the level of awareness of human rights issues amongst the corporate participants, reflecting differing levels of engagement with human rights issues. Each company and sector is in a different situation, and the level of outside scrutiny on human rights may differ according to the company's size and sector.

1-4.b Scope of Study and Analysis

The 2016 Workshop does not include the following study and analysis.

- The interconnection map of WEF Global Risks illustrated in “Human Rights Issues by Sector (v.3)” is not discussed or in the scope of analysis, as it is not related to the orientation and aim of the Workshop.
- The finance, pharmaceutical, apparel and textiles, paper and printing, and consulting and auditing sectors are not in the scope of analysis, as the Workshop do not review them.

1-4.c Addition of New Sector

The 2016 Workshop added the Consumer Goods Sector (Sports and Daily Goods).

2 CRT Japan's viewpoint as the Secretariat of Nippon CSR Consortium

In international CSR movement, the growing importance of addressing Business and Human rights issues is on the rise mainly among the Western countries. At the G7 Summit in Schloss Elmau Germany, G7 leaders pledged to promote responsible supply chains, and strongly supported the UN Guiding Principles on Business and Human Rights. In the UK, the Modern Slavery Act was passed. As this case illustrates, legislation and mandatory for CSR continues to progress rapidly. In the rapidly growing social responsible investment (SRI) market, an initiative called “Corporate Human Rights Benchmark” has begun its benchmark process evaluating 100 selected companies. There are increasing the media coverage and the development of social media. In the changing social environment surrounding companies, demands for companies to address CSR issues in the context of Business and Human Rights become certainly growing. It addition, along with global business expansion, companies are always in a situation of facing local human rights and environmental issues which are occurring in areas of their operation sites. There are always various types of “risks” beyond the scope of companies’ understanding. This means that the companies are always exposed to unpredictable “mine risks”. From the perspective of risk-management, it is important for companies to address CSR issues.

The SDGs show significant global priority issues for 2030 and provide a vision of how the world should look like. The SDGs can be taken by companies for business opportunity. However, it is very important that companies should consider any negative impacts arising from their business operations when addressing the SDGs issues. The lesson learned from the 2016 Workshop is that companies need to identify where the greatest positive and negative impacts occur through their value chain, and then decide which the SDGs issues should be addressed as a high priority to them. This ensures extremely long-term benefits for companies.

The SDGs clearly focus on human rights, as fully committed to “Leaving no one behind”. Companies should conduct a mapping of their value chain to identify high impact areas for their stakeholders. And, when they conduct dialogues with their stakeholders potentially and actual adversely impacted by corporate operations, it is very important for them to discuss with the standpoint of those people and address negative impacts in which they produce. Positive impacts should not be offset by negative impacts. Through the implementation of the Workshop, the UN Guiding Principles on business and human rights was recognized as a very useful tool to understand where potential and actual adverse impacts on human rights occur through value chain.

The participants learned that the “Human Rights Issues by Sector” papers, developed as the results of the discussions between companies and NGO/NPO, served as the base for identifying high impact areas through value chain. Also, they worked to identify negative impacts through value chain in the past workshops. This acquired knowledge also helped to explore what positive impacts could be produced if negative impacts were addressed.

The lesson from the past Workshops is that when companies address human rights related risks, they should take the standpoint of their stakeholders. To develop such a viewpoint, companies need to develop grievance mechanisms, conduct dialogues with the people with human rights abuses and NGOs, and conduct human rights due diligence processes. In sum, companies should listen to the local voices of the people adversely impacted, identify their specific pressing issues, and address the issues with utilizing high expertise and strategies. And, companies should be held accountable for any harm they cause and outcomes of their actions, as well as should enhance their transparency by disclosing information linked to economic, environmental, and ethical aspects related to their businesses in order to ensure legitimacy of their business operations. By doing so, companies can earn “License to Operate” and trust from stakeholders which becomes a backbone for corporate sustainable competitiveness in the long run.

3. Overview of the Public Consultation 2016

The secretariat summarized the discussion contents in the Workshop and conducted public consultation on them from 30th September to 31st August. Following consideration of the received comments, they are categorized as the following four points.

- About the Workshop

Important human rights issues and priorities on the SDGs are identified through a process of dialogue with multi-stakeholders such as companies, NGO/NPO and subject experts. This paper is a really helpful tool for companies in reducing risks of human rights violations, improving business in a way to contribute to achievement of SDGs, and developing new business. In addition, this workshop is regarded as innovative domestically and internationally in using SDG Compass by both companies and NGO/NPO, and discussing positive and negative impacts through value chain.

The UNEP FI welcomes the reference made by Caux Round Table Japan (CRT Japan) to UNEP FI online Human Rights Guidance Tool for the Financial Sector as a guide for corporations and other relevant stakeholders, in the process of developing and implementing human rights due diligence in their organizations. By creating a platform to share business commitment and good practice to deliver the SDGs, Japan CRT complements UNEP FI efforts to revitalize the global partnership for sustainable development, as captured in Goal 17, at country level. UNEP FI urges financial institutions to engage in the movement for financing the SDGs, as a tool to “realize the human rights of all.”

- SDGs, Business and Human Rights

It is not wrong for companies to take SDGs as business opportunities and to identify and address risk factors that could prevent achievements of SDGs in terms of risk management. However, in terms of business and human rights, and in the context of the SDGs' commitment to “Leaving no one behind”, SDGs and human rights are essentially two sides of the same coin. John Ruggie, a former Special Representative of the UN Secretary-General on Business and Human Rights, also emphasized that companies' social development initiatives cannot substitute for measures to address the negative human rights impacts their operations and relationships may have⁸. Also, he stressed that for business to maximize its contribution to sustainable development, it must put efforts to advance respect for human rights at the heart of the people part of sustainable development⁹. Thus, companies should possess awareness to fulfil their responsibility to respect human rights when addressing the SDGs.

- Challenge for Corporate Participants

Although the Workshop has been organized for 5 years, companies have yet to step out from the initial stage of stakeholder engagement. They should utilize this opportunity to identify how their business activities may cause adverse impacts on human rights of their domestic and global stakeholders, and

⁸ <http://www.shiftproject.org/resources/viewpoints/sustainable-development-goals-guiding-principles/> (Accessed on 17th November, 2016)

⁹ http://www.hurights.or.jp/archives/newsinbrief-ja/section3/keynote_ruggie_161114e.pdf (Accessed on 1st December, 2016)

conduct engagement with the adversely affected stakeholders. And, as a next step, companies should discuss how violations of human rights caused by companies can be reduced within their companies as well as within and across their sectors.

- Expectation for Corporation Participants

When companies address the SDGs, it should be noted that the goals and targets of the SDGs as well as positive and negative impacts that business activities give, which are considered to be important by companies, do not always correspond to the ones which are considered to be important by stakeholders. If companies identify by themselves, their activities may be regarded as self-satisfying by stakeholders, which may make it hard for companies to gain social trust. For this reason, companies should understand underlying meaning of stakeholder engagement and show their pose to address issues in collaboration with various stakeholders. In addition, it is important to develop a risk prevention plan before actual occurrence of human rights violations, and raise a voice together with NGOs/NPOs to the Japanese government to develop a NAP.

On 15th and 16th September 2016, “Business and Human Rights Conference in Tokyo¹⁰” was held. In the conference, the 2016 Workshop was introduced to global experts in the field of sustainability and human rights. Then, the corporate participants and NGOs/NPOs in the Workshop exchanged views with the global experts. Through the discussion, the participants learned the importance of conducting dialogues with civil organizations and NGOs which companies have relation with in their supply chain, and more importantly, dialogues with rights-holders. In addition, the participants learned that conducting dialogues across sectors is also important to enhance sensibility to human rights issues.

As a platform, Nippon CSR Consortium will continue to collaborate with companies, NGOs/NPOs, subject experts, and other initiatives to enhance support for solving issues linked to business and human rights. We sincerely hope that Workshop will assist companies in taking an initial step to carry out human rights due diligence.

¹⁰ It was organized by CRT Japan, Institute for Human Rights and Business, and Business & Human Rights Resource Centre. <http://crt-japan.jp/en/seminar-overview/global-conference/>

4 Human Rights Issues by Sector (v.5)

As the result of the discussions in the 2016 workshop, the newly added or edited parts are shown with underlines, while the deleted parts are shown under each table of the sectors.

4.1 Manufacturing (electricity, precision, machinery, others)

Key value chains applicable to the manufacturing sector were classified into seven categories, and concrete issues were further explored focusing on the products and services specified below.

4.1.1 Key value chains in manufacturing sector

Create: research, development, design

Buy: capital investment, procurement

Manufacture: production, manufacturing

Transport: storage, logistics

Sell: distribution, sales and marketing

Use: consumption, utilization

Discard: disposal, recycle

4.1.2 Discussed products and services

Construction machinery

Small electronic devices

Office imaging equipment

Electronic measuring instruments

4.1.3. Potential human rights issues in the specified products and services, relevant value chains

| Key human rights issues in the manufacturing sector (electricity, precision machinery, others) | | | Concrete issues *Highly relevant value chains are shown in parentheses [] | Value Chain | | | | | | |
|--|-----------------------------|--|---|-------------|-----|-------------|-----------|------|-----|---------|
| | | | | Create | Buy | Manufacture | Transport | Sell | Use | Discard |
| Core operation/ Supply chain | Workplace conditions | Working hours and wage | <ul style="list-style-type: none"> Long working hours may become the norm in overseas factories, due to low wages not matching local standards of living, and piece-rate work. | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | | | <ul style="list-style-type: none"> Unpaid overtime work in Japan. | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | | Health and safety | <ul style="list-style-type: none"> Severe incidents causing death or injury especially within research and development, as well as manufacturing sites. [C/M] Long working hours may cause health problems, in particular, mental health problems. Progression of diseases by non-health checkups. Inadequate living conditions (living in a dormitory within the factory, sharing one small dormitory room with several people, being locked up for control) and poor sanitation (shower, toilet, etc.) may affect the health of the employees. Lack of protective equipments such as finger sacks, gloves, masks, eye-plugs or progress of occupational diseases due to not wearing them | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | Discrimination | During work | <ul style="list-style-type: none"> Inequality in working conditions, training, and promotion, discrimination against female workers and sexual minorities, <u>sexual and power harassment</u>. | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| | Child labour | Minimum age | <ul style="list-style-type: none"> There may be possible risks of child labour and trafficking through brokers in supply chains across developing countries (e.g. subcontracting works). Job applications may be made using false age. | | ✓ | ✓ | ✓ | ✓ | | ✓ |
| | Forced or compulsory labour | Deposits and papers | <ul style="list-style-type: none"> “Mediators” may require foreign workers in Asian countries to hand over ID (e.g. passport) and/or pay excessive commission at the time of recruitment. | | | ✓ | ✓ | | | ✓ |
| | | Forced overtime | <ul style="list-style-type: none"> Risk of long working hours may cause forced overtime, due to excessive quota requirements. | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| Freedom of association and collective bargaining | — | <ul style="list-style-type: none"> Potential lack of communication/dialogue between labour representatives and unions. Potential insufficiency in institutionalization and operation of labour-management consultation and/or absence of substantive collective bargaining. Potential insufficiency in protecting workers’ rights in union shop Potential insufficiency in protecting worker’s right, where trade unions are banned or not fully implemented (including real cases where trade unions are banned). | ✓ | ✓ | ✓ | ✓ | ✓ | | | |

CAUX ROUND TABLE

| Key human rights issues in the manufacturing sector | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | | | |
|---|----------------------------|--|---|-------------|-----|-------------|-----------|------|-----|---------|
| | | | | Create | Buy | Manufacture | Transport | Sell | Use | Discard |
| Community | Resources | Use of natural resources | <ul style="list-style-type: none"> Designing and developing products, transporting and sale with low environmental burdens (less electric consumption, easy to recycle). [C/U/D/T/U] Abuse and contamination of land and water at a factory or local construction site. [B/M/D] | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | Security | Non-state groups and security payments | <ul style="list-style-type: none"> Potential diversion of funds, goods and services¹¹ to non-state groups, and armed groups. (e.g. conflict minerals¹²) | | ✓ | | | | | |
| Society and government | Relations with governments | Relations to states with poor human rights records | <ul style="list-style-type: none"> A new venture (e.g. plant construction) by a government may be launched without obtaining appropriate consent from local communities, including indigenous people and minorities. At time of bidding for a plant construction and operation, the labour standard presented by a host government may not comply with the international standards. Offshore development[C], road infrastructures [T], waste disposal[D] | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | | Bribery and corruption | <ul style="list-style-type: none"> Potential risk of being involved in bribery and corruption, such as facility payments, especially at time of obtaining licenses and authorizations. [M] Possible risks of corruption when entering into a contract, customs of the manufacturing industry, friendships when contracting and operating, as well as of being involved in corrupt practices when receiving orders from government. [S] | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Consumer | Relations with customers | Health and safety | <ul style="list-style-type: none"> Potential positive impacts of changing consumer behaviours (e.g. conducting responsible marketing considering health and safety of consumers) [S], and contributing to raising consumers' awareness of environmental issues. [U/D] Potential risk to the lives or bodies of end consumers are created due to a defect in specified products provided through the customer/clients. [C/M] | ✓ | | ✓ | | ✓ | ✓ | ✓ |

¹¹ Voluntary Principles on Security and Human Rights to identify benchmarks (<http://www.voluntaryprinciples.org>)

¹² The law on using conflict minerals is now quite clear, and as part of their due diligence, companies need to take many measures into account. Refer to *The OECD Due Diligence Guideline for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas* (<http://www.oecd.org/corporate/mne/mining.htm>) and an example, the *Dodd-Frank Wall Street Reform and Consumer Protection Act* (<http://www.sec.gov/about/laws/wallstreetreform-cpa.pdf>) Conflict minerals directly contribute to the maintenance of conflict and are associated with sexual violence against women and girls, such as that in the North and South Kivus.

4.1.4 Human rights issues in the manufacturing sector and the relevant value chains, other than the specified products and services

- Core operation/ Supply chain > child labour > minimum age and Community > resources > others
Products collected in industrialized countries for recycling purpose are shipped to developing countries and disposed there finally as waste. There is a potential risk of child labour, if children are involved in collecting recyclable material from the wastes in these countries. If the products/waste is hazardous and toxic and poorly-handled, there is a potential risk of disastrous human rights consequences for the health and safety of the people in community¹³. [D]
- Community > resources > use of natural resources
Protecting traditional knowledge of indigenous people, and sharing with them the profits derived from the use of such knowledge. (ABS: Access and Benefit-Sharing) [C/B]

¹³ Case profile: Tragigura lawsuits in Cote d'Ivoire.
(<http://business-humanrights.org/en/trafigura-lawsuits-re-côte-d'ivoire#c9344>)

4.2 Manufacturing (Infrastructure)

Key value chains applicable to the manufacturing sector (Infrastructure) were classified into seven categories, and concrete issues were further explored focusing on the products and services specified below.

As the result of the discussions in the 2016 Workshop, the newly added or edited parts are shown with underlines, while the deleted parts are shown under each table of the sectors.

4.2.1 Key value chains in manufacturing sector (Infrastructure)

Create: research, development, design

Buy: capital investment, procurement

Manufacture: production, manufacturing

Transport: storage, logistics

Sell: distribution, sales and marketing

Use: consumption, utilization

Discard: disposal, recycle

4.2.2 Discussed products and services

Infrastructure

5.2.3 Potential human rights issues in the specified products and services, relevant value chains

| Key human rights issues in the manufacturing (infrastructures) sector | | | Concrete issues *Highly relevant value chains are shown in parentheses [] | Value Chain | | | | | | | |
|---|-----------------------------|--|--|-------------|-----|-------------|-----------|------|-----|---------|--|
| | | | | Create | Buy | Manufacture | Transport | Sell | Use | Discard | |
| Core operation/ Supply chain | Workplace conditions | Working hours and wage | • Long working hours may become the norm in overseas factories, due to low wages not matching local standards of living, and piece-rate work. | | ✓ | | | | | | |
| | | | • Unpaid overtime work in Japan (increasing at-home overtime along with development of IT). | ✓ | ✓ | ✓ | ✓ | ✓ | | | |
| | | Health and safety | • Severe incidents causing death or injury especially within research and development, as well as manufacturing sites. [C/M] | ✓ | ✓ | ✓ | ✓ | | ✓ | ✓ | |
| | | | • Long working hours may cause health problems, in particular, mental health problems. | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | |
| | | | • Inadequate living conditions (living in a dormitory within the factory, sharing one small dormitory room with several people, being locked up for control) and poor sanitation (shower, toilet, etc.,) may affect the health of the employees. | | ✓ | ✓ | | | | | |
| | | | • Lack of protective equipments such as finger sacks, gloves, masks, eye-plugs or progress of occupational diseases due to not wearing them | ✓ | ✓ | ✓ | ✓ | | | | |
| | Discrimination | During work/ Employment | • Inequality in working conditions, training, and promotion, discrimination against female workers, disabilities, sexual minorities, ethnic groups and religions) | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ | |
| | Child labour | Minimum age | • There may be possible risks of child labour and trafficking through brokers in supply chains across developing countries (e.g. subcontracting works). Job applications may be made using fake identities. | | ✓ | ✓ | | | | | |
| | Forced or compulsory labour | Deposits and papers | • “Mediators” may require foreign workers in Asian countries to hand over ID (e.g. passport) and/or pay excessive commission at the time of recruitment. | | ✓ | ✓ | | | | | |

| Key human rights issues in the manufacturing (infrastructures) sector | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | | | | |
|---|----------------------------|--|--|-------------|-----|-------------|-----------|------|-----|---------|---|
| | | | | Create | Buy | Manufacture | Transport | Sell | Use | Discard | |
| Community | Resources | Use of natural resources and infrastructures | <ul style="list-style-type: none"> Designing and developing products with low environmental burdens (less electric consumption, easy to recycle). [B/M/D] Grabbing of lands that local people can access to water in and can use for agricultures as basis of their lives. | | ✓ | ✓ | | | | | ✓ |
| | Security | Non-state groups and security payments | <ul style="list-style-type: none"> Potential diversion of funds, goods and services¹⁴ to non-state groups, and armed groups. (e.g. conflict minerals¹⁵) | | ✓ | | | | | | |
| Society and government | Relations with governments | Relations to states with poor human rights records | <ul style="list-style-type: none"> A new venture (e.g. plant construction) by a government may be launched without obtaining appropriate consent from local communities, including indigenous people and minorities. Possible risks that standards of local laws are lower than international standards. | | ✓ | ✓ | | | | | |
| | | Bribery and corruption | <ul style="list-style-type: none"> Potential risk of being involved in bribery and corruption, such as facility payments, especially at time of obtaining licenses and authorizations. [M] Possible risks of corruption when entering into a contract, customs of the manufacturing industry, friendships when contracting and operating, as well as of being involved in corrupt practices when receiving orders from government. [S] | | ✓ | ✓ | ✓ | ✓ | | | |
| | Relations with customers | Health and safety | <ul style="list-style-type: none"> Potential risk to the lives or bodies of end consumers are created due to a defect in specified products and services provided through the customer/clients | ✓ | ✓ | ✓ | | ✓ | ✓ | ✓ | |
| | Biodiversity | | <ul style="list-style-type: none"> <u>Negative impacts on marine resources and terrestrial ecosystem.</u> | | | ✓ | | | | ✓ | |
| Education | | | <ul style="list-style-type: none"> <u>Potential risk to include expression that may cause violations of human rights in corporate reports and commercials.</u> | | | | | ✓ | | | |

¹⁴ Voluntary Principles on Security and Human Rights to identify benchmarks (<http://www.voluntaryprinciples.org>)

¹⁵ The law on using conflict minerals is now quite clear, and as part of their due diligence, companies need to take many measures into account. Refer to *The OECD Due Diligence Guideline for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas* (<http://www.oecd.org/corporate/mne/mining.htm>) and an example, *the Dodd-Frank Wall Street Reform and Consumer Protection Act* (<http://www.sec.gov/about/laws/wallstreetreform-cpa.pdf>) Conflict minerals directly contribute to the maintenance of conflict and are associated with sexual violence against women and girls, such as that in the North and South Kivus.

4.2.4 Human rights issues in the manufacturing sector and the relevant value chains, other than the specified products and services

- Core operation/ Supply chain > child labour > minimum age and Community > resources > others
Products collected in industrialized countries for recycling purpose are shipped to developing countries and disposed there finally as waste. There is a potential risk of child labour, if children are involved in collecting recyclable material from the wastes in these countries. If the products/waste is hazardous and toxic and poorly-handled, there is a potential risk of disastrous human rights consequences for the health and safety of the people in community¹⁶. [D]
- Community > resources > use of natural resources

Protecting traditional knowledge of indigenous people, and sharing with them the profits derived from the use of such knowledge. (ABS: Access and Benefit-Sharing) [C/B]

¹⁶ Case profile: Tragigura lawsuits in Cote d'Ivoire.

4.3 Information, Communication and Technology (ICT)

Key value chains applicable to the ICT sector were classified into six categories, and concrete issues were further explored focusing on the products and services specified below.

As the result of the discussions in the 2016 Workshop, the newly added or edited parts are shown with underlines, while the deleted parts are shown under each table of the sectors.

4.3.1 Key value chains in ICT sector

Create: research and development

Buy: capital investment for office and data centre, procurement of machine/equipment/raw materials and soft ware

Produce: information planning, program development, system maintenance

Sell: network provider, sharing system, system maintenance & operation service, sales and marketing

Use: shared system operation, data archival

Discard: depreciation/amortization

4.3.2 Potential human rights issues in the specified products and services, relevant value chains

| Key human rights issues in ICT sector | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | | |
|---------------------------------------|--|-------------------------|---|-------------|-----|---------|------|-----|---------|
| | | | | Create | Buy | Produce | Sell | Use | Discard |
| Core operation/ Supply chain | Workplace conditions | Working hours | <ul style="list-style-type: none"> Long working hours (including attendance at weekends) and unpaid work in system development process (e.g. pre-release period, during system trouble) [C/B/P/U] Industrial health and safety of workers at overseas subcontractors (outsourcing providers) and/or System Integrators may not be ensured, because political and economic factors are different from Japan. [C/P/U] | ✓ | ✓ | ✓ | ✓ | ✓ | |
| | | Health and safety | <ul style="list-style-type: none"> Long working hours may cause health problems, especially mental health problems Possible risks to safety and health due to work at facilities of networks | ✓ | | ✓ | ✓ | ✓ | |
| | Discrimination | During work | <ul style="list-style-type: none"> Gender (discrimination against female workers), sexual orientation and nationality inequality in training and promotion Female workers may be transferred to other departments without their will, after taking maternity leave. Workers who take care of other family members may be transferred to other departments without their will. | | ✓ | ✓ | | ✓ | |
| | Forced or compulsory labour | Forced overtime | <ul style="list-style-type: none"> Excessive quota requirements may lead to long working hours and forced overtime. <u>Forced labour may be conducted in sites of equipment suppliers</u> | ✓ | | ✓ | ✓ | ✓ | |
| | Freedom of association and collective bargaining | Conflict with local law | <ul style="list-style-type: none"> Freedom of association and collective bargaining may not be ensured. | ✓ | | ✓ | | | |
| | Protection and storage of personal data | — | <ul style="list-style-type: none"> Personal information held by the company may be leaked. Personal information may be gathered and used without gaining agreement of individuals. [S/U] Inadequate education to employees who deal with management of personal information may not contribute to a rise in awareness of them. [S/U] Consumers may not be able to acquire ways to recognize and avoid risks due to inadequate trainings and education on risks of personal information to them. [U] | | | ✓ | ✓ | ✓ | ✓ |

As the result of the discussions, “Check” was removed from “Create”, “During Work” and “Discrimination”.

CAUX ROUND TABLE

| Key human rights issues in ICT sector (continued) | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | | | |
|--|----------------------------|--|-------------|-----|---------|------|-----|---------|---|
| | | | Create | Buy | Produce | Sell | Use | Discard | |
| Community | Resources | Use of natural resources (water, land, etc.) | | ✓ | | | | ✓ | ✓ |

| | Community investment | — | | | ✓ | | ✓ | | |
| Society and government | Relations with governments | Relations to states with poor human rights record | | ✓ | ✓ | ✓ | ✓ | | |
| | | Bribery and corruption | | ✓ | | | ✓ | | |
| | Relations with society | | | | | | ✓ | | |

CAUX ROUND TABLE

| Key human rights issues in ICT sector (continued) | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | | |
|---|--------------------------|---|--|-------------|-----|---------|------|-----|---------|
| | | | | Create | Buy | Produce | Sell | Use | Discard |
| Consumer | Relations with customers | — | <ul style="list-style-type: none"> • Potential violation of privacy by information leakage, especially in system operation • Big Data services that gather public consumer data may unintentionally identify personal data by combining information, and there is a potential risk of misuse the customer personal data for commercial purposes without prior approval from users. • Possible risks of violating human rights due to improper websites (suicide websites) and improper use of ICT (revenge porn). • Violence on the Internet, verbal abuses, and porn may pose risks of giving adverse impacts on psychological development of children. [U] | | | | ✓ | ✓ | |

4.4 Logistics and Transport

Key value chains applicable to the Logistics and Transport sector were classified into five categories, and concrete issues were further explored focusing on the products and services specified below.

As the result of the discussions in the 2016 Workshop, the newly added or edited parts are shown with underlines, while the deleted parts are shown under each table of the sectors.

4.4.1 Key value chains in logistics and transport

Create: research, development

Buy: capital investment, procurement of ships, vehicles, aircrafts, and fuel

Sell: promotion, sales

Transport: storage, logistics, transportation

Discard: disposal, recycle

4.4.2 Discussed products and services

Compound logistics business, logistics (land, marine, air), transport(aircraft, freight)

4.4.3 Potential human rights issues in the specified products and services, relevant value chains

| Key human rights issues in logistics and transport sector | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | |
|---|----------------------|-------------------|--|-------------|-----|------|-----------|---------|
| | | | | Create | Buy | Sell | Transport | Discard |
| Core operation/ Supply chain | Workplace conditions | Working hours | ※ Logistics and Traffic industries are a labor-intensive industry. Though it is anticipated that mechanization is further advanced in the future, laborious work of human beings will still remain. <ul style="list-style-type: none"> • Long working hours at fields and subcontracting companies especially in busy seasons. • Long working hours such as night work and early morning work due to time difference with other countries • Because logistics industry has the public nature, unexpected long working hours may happen during occurrence of disasters. | | | | ✓ | |
| | | Low wages | <ul style="list-style-type: none"> • Wages may be lower than a level of wages necessary to support workers and their families • Working hours may get longer due to expansion of mail-order markets. As a result, wages per unit of time decrease | | | | ✓ | |
| | | Health and safety | ※ Dangerous work always exist in sites of logistics and traffic such as loading and unloading heavy objects, transporting, using large machines, vehicles, work nearby trains, <u>aircrafts and ships</u> . It is important to make daily efforts to prevent risks from occurring so as to keep working places safe. <ul style="list-style-type: none"> • Workplace accidents could occur due to lack of sufficient safety instructions at site where heavy machinery and cargos operate, such as terminal, <u>aircrafts and airports</u>, and ship under operation for marine transportation industry. (shipping industry) • Safety of workers in marine transportation industry when in waters in which piracy can take place • Because logistics industry has the public nature, secondary disasters of labor hazards may occur • Long working hours may cause mental health risks. • <u>Potential risks of causing forced and child labour, and threatening health and safety of workers and others in supply chains.</u> | | | | ✓ | |
| | Discrimination | During work | ※ As lack of human capital due to a shrinking population is anticipated, personnel and forms of employment such as contract/temporary workers, ex-employer based on reemployment system, the change of the employment status of temporary employees to regular employees, reduction of working hours, working at home. <ul style="list-style-type: none"> • Inequality in working conditions, training and promotion may occur due to various types of employments and various human capitals. • <u>Foreigner nationals may face discriminatory treatment in employment and payment.</u> • <u>Uniform treatment to workers without due concern for diversity elements such as religions and cultures.</u> | | | | ✓ | |

CAUX ROUND TABLE

| Key human rights issues in logistics and transport sector (Continued) | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | |
|--|-----------|--------------------------|---|-------------|-----|------|-----------|---------|
| | | | | Create | Buy | Sell | Transport | Discard |
| Community | Resources | Use of natural resources | <p>※ Diversification of power generation by the user of fossil fuels, nonconventional natural gas resources, as well as natural energy makes a progress.</p> <ul style="list-style-type: none"> • Potential risks of causing or contributing to environmental pollution such as air pollution, water quality degradation or destruction of natural habitats at the site of oil extraction. [B] • Exhaust gas from vehicles operating frequently along the same route may cause or contribute to local air pollution. [T] • <u>Environmental destruction such as soil contamination, water quality degradation, air pollution may occur due to construction and use of factories/logistic centers, roads, railroads, ports and airports</u> • <u>Procurement and use of fossil fuel, and inefficient use of resources may cause climate change which gives a negative impact on lives of people.</u> • <u>Efficient use of natural resources can contribute to sustainable development (positive impact).</u> | | ✓ | | ✓ | |
| | | Use of infrastructure | <ul style="list-style-type: none"> • Vehicles, ships, and aircrafts operated by companies may cause a damage on roads and ports where they operate • <u>Disasters may damage infrastructures and disrupt logistics.</u> • <u>Efforts to recover infrastructures such as roads and logistic centres after disasters, and maintain basic infrastructure for local daily life (positive impact).</u> | ✓ | ✓ | | | ✓ |
| | | Security | <ul style="list-style-type: none"> • <u>Potential risk of giving a negative impact on health and safety of customers, the public, and other stakeholders.</u> • Potential risk of excess use of force like violence by national navies dispatched to areas where piracy is occurring or by armed guard hired by a company to protect logistic centres in less secure areas. • Potential risk of excess use of force like violence by armed guard on-board ships to mariners and piracy. (shipping industry) • A potential risk to navies, piracy may abuse the rights of local communities such as fishermen. (shipping industry) | | | | ✓ | |

A public comment pointed out that with regards to “national navies dispatched to areas where piracy is occurring” and “Potential risk of excess use of force like violence by armed guard on-board ships to mariners and piracy”, companies do not take responsibility for acts of national navies and piracy, thus these should be removed.

CAUX ROUND TABLE

| Key human rights issues in logistics and transport sector (Continued) | | | Concrete issues *Highly relevant value chains are shown in parentheses []. | Value Chain | | | | |
|--|------------------------------|------------------------|---|-------------|-----|------|-----------|---------|
| | | | | Create | Buy | Sell | Transport | Discard |
| Community | Community Investment | | <ul style="list-style-type: none"> • <u>Possible contribution to local people living in areas by cooperation for operation of relief suppliers sites, transportation of relief and support suppliers to shelters during occurrence of disasters (positive impact).</u> • <u>Possible contribution to culture development, job creation, tourism promotion, industrial vitalization, and enhancement of the local infrastructure by making a long-term commitment and connecting people and goods (positive impact).</u> | ✓ | | ✓ | ✓ | |
| Society and government | Relations with governments | Bribery and corruption | <ul style="list-style-type: none"> • Possible risk of being involved unintentionally in bribery and corruption such as by way of facilitation payment. [T] • Potential risk of being involved in collusion, bribery and corruption at the time of negotiating investments and route development with governments and legislative authorities. [C/B] | ✓ | ✓ | | ✓ | |
| Others | Illegal dealing, Trafficking | Trafficking in human | <ul style="list-style-type: none"> • Potential risk of direct association with trafficking through the transportation of trafficking victims (via international airlines and shipping companies). • <u>Potential risk of transporting banned goods</u> | | | ✓ | ✓ | |

As the result of the discussions “Check” was deleted from “Buy” and “Community Investment”.

4.5 Chemical and Building Materials

Key value chains applicable to the chemical and building materials sector were classified into seven categories, and concrete issues were further explored.

4.5.1. Key value chain in the Chemical and Building Materials Sector

R&D, Procure, Produce, Transport, Sell, Use, Discard

4.5.2. Value chain and key human rights issues in Chemical and Building Materials sector

✓✓ indicates very important. ✓ indicate important.

| Key human rights issues in chemical and building material sectors | | | Concrete issues | Value Chain | | | | | | |
|---|---------------------|-----------------------|--|-------------|---------|---------|-----------|------|-----|---------|
| | | | | R&D | Procure | Produce | Transport | Sell | Use | Discard |
| Core operation/Supply chain | Workplace condition | Working hours | <ul style="list-style-type: none"> BtoB companies may face possible occurrence of overtime work arising from receiving orders without consideration of resources. (one's company and supply chain) Not enough understanding on the degree of importance in working hour management corresponding to working conditions that differ according to countries/areas. (supply chain) | ✓ | ✓ ✓ | ✓ | ✓ | ✓ | | |
| | | Health and safety | <ul style="list-style-type: none"> There are relatively many sources of risks as the industry that use hazardous substances (chemical substances) and large scale facilities. (one's company and supply chains) Possible risks of causing health hazards to employees and final consumers if suppliers do not provide complete information on chemical substances. (one's company and supply chain) Possible risks of violating human rights by outsourcing companies that conduct safety and functionality tests to human beings with poor ethical values. (supply chains) | ✓ | ✓ ✓ | ✓ ✓ | ✓ | ✓ | ✓ | ✓ |
| | | Disciplinary measures | <ul style="list-style-type: none"> Because practices of disciplinary measures differ largely according to countries and regions, there are possible risks of developing policies on disciplinary measures that do not match regions. (one's company) Inadequate grievance mechanisms against disciplined persons (one's company) Difficulty in understanding actual situations of disciplinary measures against suppliers, because practices of disciplinary measures differ largely according to countries and regions. (supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |

CAUX ROUND TABLE

| Key human rights issues in chemical and building material sectors (continued) | | | Concrete issues | Value Chain | | | | | | |
|---|------------------------|--|---|-------------|---------|---------|-----------|------|--------|---------|
| | | | | R&D | Procure | Produce | Transport | Sell | Use | Discard |
| Core operation/Supply chain | Discrimination | During work | <ul style="list-style-type: none"> Cases of discrimination issues differ in areas and time (for instance, discrimination against sexual minorities has occurred in 2015). Elimination of discrimination during work globally remains unsolved. (one's company and supply chains) Possible risks of violating human rights of disabled people due to the delay of development of working places. (one's company and supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | | Redundancy and dismissal | <ul style="list-style-type: none"> Clear and convincing selection standards may not be presented during redundancy and dismissal (one's company and supply chain) Possible risks such as taking a legal case from not conducting an appropriate communication based on standards of judgment for redundancy. (one's company and supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | Forced Labour | Deposits and papers | <ul style="list-style-type: none"> There are high reputational risks during occurrence of forced labour, because the presence or absence of migrant workers is not globally and comprehensively identified. (one's company and supply chains) | ✓ | ✓ ✓ | ✓ | ✓ | ✓ | ✓ ✓ | ✓ |
| | | Forced overtime | <ul style="list-style-type: none"> BtoB companies may possibly demand forced overtime, because they receive orders without consideration of their resources (volunteer overtime work ends up being overtime work) (one's company and supply chains) | ✓ | ✓ ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | | Trafficking in human | <ul style="list-style-type: none"> There are high reputational risks during occurrence of forced labour, because the presence or absence of migrant workers is not globally and comprehensively identified. (one's company and supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | Freedom of association | Freedom of association and collective bargaining | <ul style="list-style-type: none"> Possible risks of facing a production suspension due to occurrence of strikes and boycotts, if negotiation between management and labour is not conducted correctly. (one's company and supply chains) Employees may not have a means to discuss issues related to labour without interference of companies. (one's company and supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |

CAUX ROUND TABLE

| Key human rights issues in chemical and building material sectors (continued) | | | Concrete issues | Value Chain | | | | | | |
|---|----------------------------|--------------------------|--|-------------|---------|---------|-----------|--------|-----|---------|
| | | | | R&D | Procure | Produce | Transport | Sell | Use | Discard |
| Core operation/Supply chain | Freedom of association | Conflict with local law | <ul style="list-style-type: none"> • Possible risks of facing a production suspension due to occurrence of strikes and boycotts, if negotiation between management and labour is not conducted correctly. (one's company and supply chains) • Employees may not have a means to discuss issues related to labour without interference of companies. (one's company and supply chains) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Community | Resources | Use of natural resources | <ul style="list-style-type: none"> • The industry may give a huge impact to local communities, as it uses a relatively large amount of resources and has a potential for causing pollution damage by discharge and leak of hazardous materials. (one's company and supply chains) • Possible risks of water depletion due to construction of factories and deforestation. (supply chains) • Possible risks of causing an adverse impact on local communities due to depletion of natural resources. (supply chains) | ✓ | ✓ ✓ | ✓ ✓ | ✓ | ✓ | ✓ | ✓ |
| Society and government | Relations with governments | Bribery and corruption | <ul style="list-style-type: none"> • Due to an extension of the scope of application of legislation on bribery and increase in enormous surcharge payment, there are potential impacts of giving to stakeholders such as employees and investors (one's company and supply chains) • Bribery and excessive treatment to foreign public officials, risks of excessive payment to smoothen transactions, risks of receiving an order of suspension of operations from not engaging. (one's company and supply chains) | | ✓ ✓ | ✓ | ✓ | ✓ ✓ | | ✓ |

| Key human rights issues in chemical and building material sectors (continued) | | | Concrete issues | Value Chain | | | | | | |
|---|----------------------------|---------------------------------------|---|-------------|---------|---------|-----------|------|-----|---------|
| | | | | R&D | Procure | Produce | Transport | Sell | Use | Discard |
| Society and government | Relations with governments | Gov'ts with poor human rights records | <ul style="list-style-type: none"> • Potential risks of being involved in violations of human rights due to operations in countries with poor human rights activities. (one's company and supply chains) • Potential risks of being involved in violations of human rights by gaining permissions from local governments (reputational risks by operations in countries with poor human rights records and risks involved in human rights abuses) (one's company and supply chains) • Potential risks of squeezing profits, because it requires more resources to undertake activities to raise awareness of human rights. (one's company) | | ✓ ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| | Relations with consumers | Health and safety | <ul style="list-style-type: none"> • Potential risks of causing health hazards to consumers, because chemical materials are used. Also, risks are present if information on value chains is not properly shared. (one's company and supply chains) | | | | | | ✓ | ✓ |

4.5.3 History of Revision (July, 2016)

1. The sector reviewed supply chain and the segment name of supply chain.
2. The sector recognized the importance of focusing on upstream supply chain, following consideration on the opinions of NGOs/NPOs and discussions on the SDGs contents.
3. Based upon the gained understanding, the sector reviewed the key human rights outlined in UNEP FI and recognized the importance of understanding and addressing invisible risks thoroughly in supply chain stages of “procurement” and “produce”.
4. The sector created a double-check status(✓✓) to emphasize great risks in upstream supply chain.

4.6 Food

As the result of the discussions in the 2016 Workshop, the newly added or edited parts are shown with underlines, while the deleted parts are shown under each table of the sectors.

| Key human rights issues in food sector | | | Concrete issues | Value Chain | | | | | | |
|--|--|-------------------|--|-------------|-----|-------------|-----------|------|-----|----------|
| | | | | Create | Buy | Manufacture | Transport | Sell | Use | Discard |
| Core operation / Supply chain | Workplace conditions | Working hours | <ul style="list-style-type: none"> Long working hours may be a burden at manufacturing factories including those of suppliers and within logistics networks that distribute the goods due to low wages not matching local standards of living, and piece-rate work. | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| | | Wages | <ul style="list-style-type: none"> Wage levels are lower than local standard of living Proper wages are not paid to workers due to application of piece-rate work Improper low wages in under Technical Intern Training Program | | ✓ | <u>✓</u> | | | | |
| | | Health and safety | <ul style="list-style-type: none"> Risk of jeopardizing health and safety of employees and workers in production (including supply chain) and R&D processes, due to causes such as mis-handling of chemical substances and agri-chemicals, and inadequate health and safety programs. | ✓ | ✓ | ✓ | | | | <u>✓</u> |

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|---|---|---|---|
| SDG# | Reason | SDG# | Reason |
|  | Using IT solutions enables to build resilient infrastructure and promote innovation that becomes current industries more sustainable. |  | As ICT technology can solve many issues, long hours and overwork tend to occur at the stage of development research, leading to an adverse impact on the health of employees. |
|  | IT solutions will be effective in addressing a wide range of issues of Goal 11, including making cities sustainable through protecting people in vulnerable situations, strengthening resilience to disaster, reducing adverse environmental impacts, and preventing crime, amongst others. |  | Abuse of advanced ICT technology can lead to several risks, including damage to social infrastructure services and leaks of information. |
| | |  | Abuse of advanced ICT technology can also result in threats to peaceful and inclusive societies |

5.4 Transport and Logistics

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|--|--|--|--|
| SDG# | Reason | SDG# | Reason |
|  | <p>Goal 7. Ensure to affordable, reliable, sustainable and modern energy for all We can contribute to SDG 7 through improving the ratio of renewable energy and fuel efficiency within operations of e.g. ships, aircraft, and vehicles. (Transport)</p> |  | <p>Goal 3. Ensure healthy lives and promote well-being for all at all ages We can reduce negative impacts on SDG 3 by preventing accidents during shipping, taking measures to implement the Piracy Act, and preventing oil spillage. (Transport)</p> |
|  | <p>Goal 8. Promote inclusive and sustainable economic growth, full and productive employment and decent work for all We can contribute to SDG 8 through promoting inter- and intraregional development, through encouraging industrial, touristic, job creation, and cultural exchange. (Selling and Transport)</p> |  | <p>Goal 7. Ensure to affordable, reliable, sustainable and modern energy for all We can reduce negative impacts on SDG 7 through increasing ratio of Green Energy and fuel efficiency.(Purchasing)</p> |
|  | <p>Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation We can contribute to SDG 9 through developing and adopting environment-friendly transportation technology, e.g. through technology for sustainable fuels. (Create) We can contribute to SDG 9 by developing reliable and resilient transport and logistics infrastructure that supports economic and human development. (Transport)</p> |  | <p>Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all We can reduce negative impacts on SDG 8, by addressing appropriately issues of long hours and foreign labourers (including Technical Intern Training Programme labourers) and not being complicit in the transport of victims of human trafficking or forced labour. (Transport)</p> |
|  | <p>Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable We can contribute to SDG 11 by supporting relationships between cities and regions and community development through providing safe and inexpensive transport and logistics. (Transport)</p> |  | <p>Goal 12. Ensure sustainable consumption and production patterns We can reduce negative impacts on SDG 12 by preventing waste and ensuring recycling of transport equipment, materials, and foodstuffs for passengers. (Waste)</p> |

5.5 Chemical and Building Materials

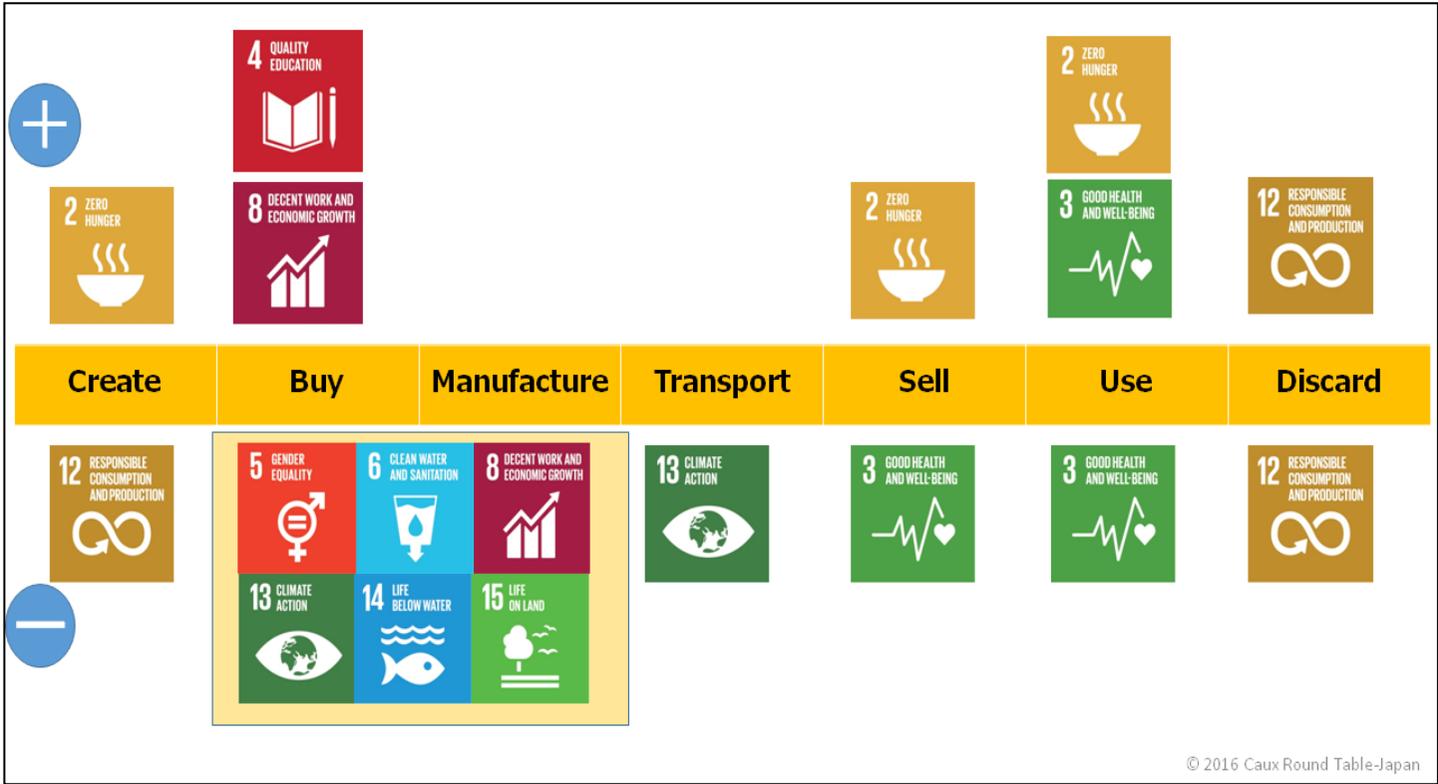

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|--|--|---|--|
| SDG# | Reason | SDG# | Reason |
|  | Useful materials that contribute to the world such as sanitary fittings (utility products), medical suppliers, healthy, water pollution |  | Causing water pollution must be avoided |
|  | Useful materials that contribute to the world, such as access to sanitary facility, water-saving, water reuse |  | Promoting decent work is fundamental for accomplishing the above sustainable development agendas |
|  | Useful materials and facilities that contribute to improvement of energy efficiency, such as power generation, storage of electricity, energy saving |  | Exposure to chemical substances or other hazardous substances must be avoided |
|  | Promoting decent work is fundamental for achieving the above sustainable development agendas |  | Challenges in eliminating plastic trash in the ocean |
|  | Useful materials and facilities that contribute to construction of resilient infrastructure (Developing countries) | | |
|  | Useful materials and facilities that contribute to construction of resilient infrastructure (Developing countries) | | |

CAUX ROUND TABLE

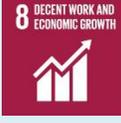

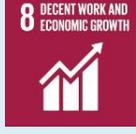

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|--|---|----------------------------|--------|
| SDG# | Reason | SDG# | Reason |
|  12 RESPONSIBLE CONSUMPTION AND PRODUCTION | Recycling plastic and packing materials contributes to elimination of waste and effective use of natural resources | | |
|  13 CLIMATE ACTION | Useful materials addressing climate change This industry consumes a large amount of energy in manufacturing and can share know-how with others | | |

5.6 Food

© 2016 Caux Round Table-Japan

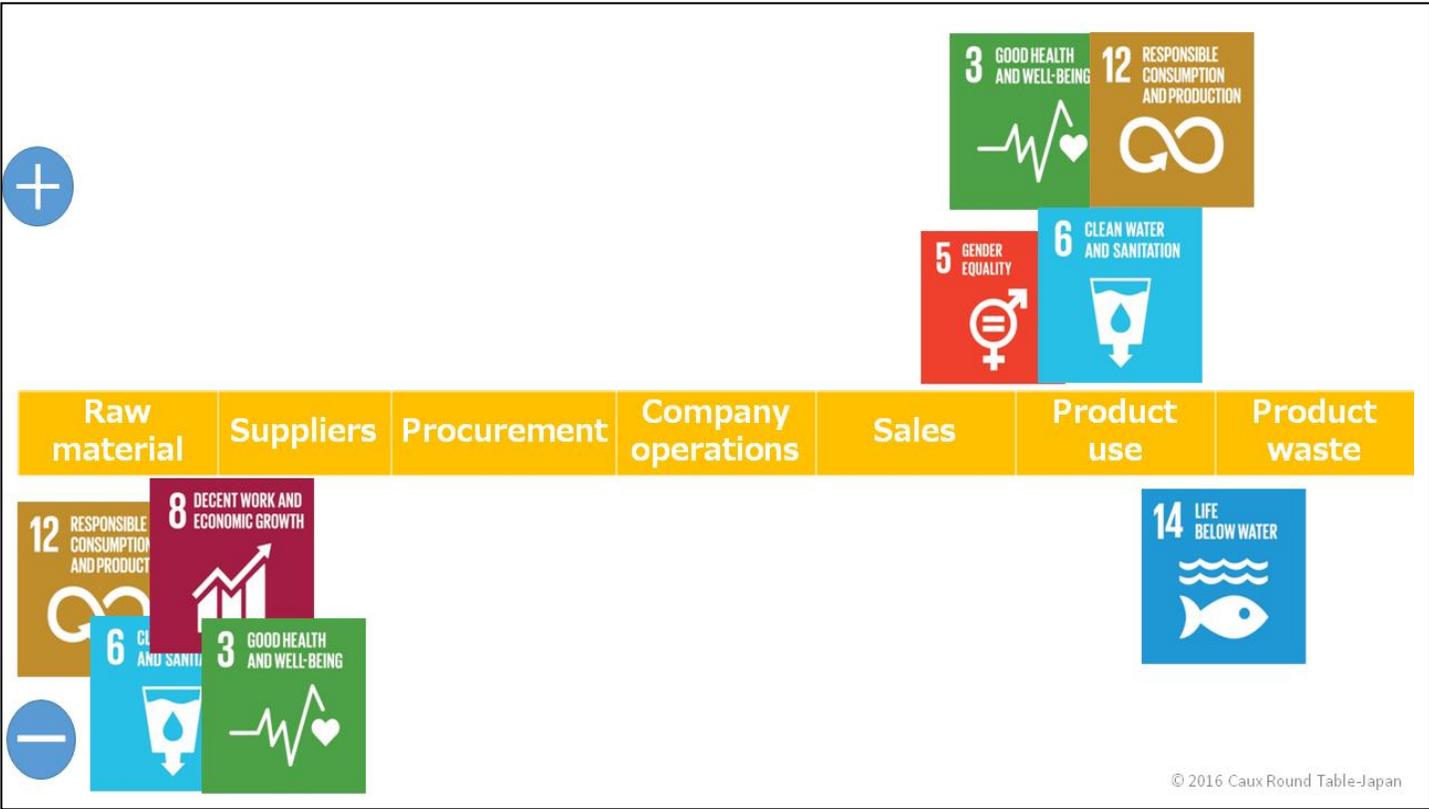

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|---|--|---|---|
| SDG# | Reason | SDG# | Reason |
|  | Developing nourishment-rich food |  | Mass sales of food considerably lacking nutritional balance Sales of malnutritional food by large amount of corporate advertisement |
|  | Providing healthy and functional food |  | Unequal working environment for women |
|  | Developing high production value crops and food by gaining knowledge on food |  | Use of a large amount of water (agriculture, processing) Shortage of drinking water due to exploitation of a large amount of underground sources |
|  | Employment for a large number of manual laborers Securing employment in rural areas |  | Child labour and forced labour Poor working conditions (cold/hot) |
|  | Loss of food reduction and effective use of food |  | A lot of food waste |
| | |  | CO2 emissions during transportation Deforestation Slash-and-burn farming |

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|----------------------------|------|---|--|
| SDG 目標 | 選択理由 | SDG 目標 | 選択理由 |
| | |  | Overfishing Discharging pesticides from factories to rivers |
| | |  | Pesticide spraying and genetic modified products for mass production Single crop cultivation at plants Felling primacy forests (biodiversity and indigenous peoples) |

5.7 Consumer Goods (Sports Goods and Daily Goods)

CAUX ROUND TABLE

| INCREASING POSITIVE IMPACT | | MINIMIZING NEGATIVE IMPACT | |
|---|--|---|--|
| SDG# | Reason | SDG# | Reason |
|   | Companies of the consumer goods sector have opportunity to raise awareness on health, and promote health and address lack of exercise through sports |   | Use of hazardous chemicals poses the risk of water pollution in supply chains. Measures need to be taken to prevent such pollution |
|  | Reducing a large amount of water usage during the use of products can ensure access to sustainable water resource |  | Challenges in identifying problems on labour and human rights in upstream supply chains |
|  | Contribution to empowerment of women by selling and using personal care products and cosmetics |  | Consumer goods manufacturers are using limited natural resources to manufacture their products. Therefore they need to work towards the sustainable use of the resources |
| | |  | Large amounts of plastics used for products, packaging and raw materials (e.g. microbeads) may cause marine pollution. Measures need to be taken to prevent such pollution |

6. List of Participants of 2016 Human Rights Due Diligence Workshop

■ Company, Foundation (40 Companies, 57 Participants)

| | |
|-----------------------|---|
| George Yoshimoto | ASICS Corporation, General Manager, CSR & Sustainability Department, Global Legal & Compliance Division |
| Seiko Inoue | ASICS Corporation, CSR & Sustainability Department, Global Legal & Compliance Division |
| Youzou Nakao | AJINOMOTO CO., INC. , Associate general Manager, Global Communications Dept. |
| Shigeru Sugimoto | ANA HOLDINGS INC., Manager, Corporate Brand & CSR |
| Mitsue Doi | ANRITSU CORPORATION, Senior Manager, CSR ・ CS Promotion Team, Corporate Communication Dept. |
| Masahiko Dohi | ANRITSU CORPORATION, Senior Manager, Corporate Communication Dept, CSR ・ CS Promotion Team & Legal Dept. |
| Noriko Kimura | AEON Co., Ltd. Manager, AEON Supplier CoC Secretariat Quality Management Dept. |
| Yuuji Arai | AEON Co., Ltd. AEON Supplier CoC Secretariat Quality Management Dept. |
| Kengo Makimoto | INSIGHT CONSULTING INC., COO |
| Minako Noda | SG HOLDINGS CO., LTD. Manager, Public Relations and CSR Unit, General Affairs Department |
| Shigenori Shiba | SG HOLDINGS CO., LTD., Assistant Manager, Public Relations and CSR Unit, General Affairs Department |
| Kazuhiko Ozeki | OLYMPUS CORPORATION, Manager, CSR Dept. CSR Div. |
| Yuzaburo Sakamoto | Kao Corporation, Risk & Crisis Management, Corporate Strategy |
| Masataka Takahashi | KAWASAKI KISEN KAISHA, LTD. Manager, CSR Division, General Affairs Group |
| Erina Sugi | KAWASAKI KISEN KAISHA, LTD., CSR Division, General Affairs Group |
| Rie Ono | Kawasaki Heavy Industries, Ltd., Assistant Manager, CSR Department |
| Miho Kuroda | Kawasaki Heavy Industries, Ltd., CSR Department |
| Kazumasa Sunagawa | Casley Consulting, Inc., CEO |
| Daichi Maeda | Casley Consulting, Inc., Planning Div., Team Leader, CSV/CSR Office |
| Hiroyuki Ishibashi | Kewpie Corporation |
| Hisatoshi Yanagihashi | Kewpie Corporation |
| Yuta Kato | INPEX CORPORATION, CSR Specialist, CSR Group, Corporate Strategy & Planning Unit, Corporate Strategy & Planning Division |
| Chiaki Ui | Cetus & General Press Inc., Chief Editor of CSR Communicate |
