

# 2020 Human Rights Due Diligence Workshop (Stakeholder Engagement Programme)

Caux Round Table Japan Shibuya Sanshin Mansion 505, 29-33 Sakuragaoka-cho, Shibuya-ku, Tokyo, 150-0031, JAPAN TEL: +81-3-5728-6365 FAX: +81-3-5728-6366 <u>http://crt-japan.jp/en/</u> 1

#### "Human Rights Issues by Sector v.9"

In September 2012, Caux Round Table Japan (CRT Japan) established the Nippon CSR Consortium as a platform for multi-stakeholders in cooperation with companies, NGOs/NPOs and academic experts. The Consortium organizes a yearly Human Rights Due Diligence Workshop where multi-stakeholders come together to discuss the relationship between business activities and human rights.

The 2020 Human Rights Due Diligence Workshop was held for the ninth year, over eight sessions in the period from 27<sup>th</sup> August to 18<sup>th</sup> November. The participants identified sector specific human rights issues using the Human Rights Guidance Tool developed by the United Nations Environment Programme Finance Initiative (UNEP FI). As a feature of the 2020 workshop, the impact and response issues of Covid-19 were also shared and discussed to identify key human rights issues. This document is the result of the participants' discussions.

This workshop applies the Chatham House Rule. The participants are free to express their views as individuals, not representatives of companies or organizations that they belonged to. The sole responsibility for the content of this document lies with CRT Japan, as an organizer of Nippon CSR Consortium.

We would like to offer our great gratitude for the participants from NGO/NPO, and companies, and those who gave public comments.

Caux Round Table Japan Nippon CSR Consortium Minoru Matsuzaki Hiroki Wada

## 1 Preface

### 1-1. Purpose of Human Rights Due Diligence Workshop

The Human Rights Due Diligence Workshop provides an opportunity for companies, NGOs/NPOs, and academic experts to conduct discussions for human rights due diligence<sup>1</sup> set out in the United Nations Guiding Principles on Business and Human Rights<sup>2</sup>.

In July 2011, the UN Guiding Principles on Business and Human Rights were unanimously endorsed by the UN Human Rights Council. The Guiding Principles explicitly and clearly set out that all business enterprises have the responsibility to respect human rights. In order to fulfil the responsibility, the Guiding Principles require them to carry out human rights due diligence that comprises process for identifying, preventing, mitigating and accounting for how they address their adverse human rights impacts. In response to the endorsement in 2011, in cooperation with companies, NGOs/NPOs and academic experts, CRT Japan established the Nippon CSR Consortium\* in 2012 as a platform for multi-stakeholders. The Consortium organizes the yearly Human Rights Due Diligence Workshop (Stakeholder Engagement Programme).

Through a series of dialogues with companies, NGOs/NPOs, and academic experts, participants can deepen understanding of the specific contexts in which human rights violations can arise, of the relationship between business activities and human rights, of important human rights issues, and of the importance of promoting business operations with due consideration given to human rights. We regard that this document, which contains the content of the discussion in the workshop and the identified sector-specific human rights issues, will be the foundation for companies to facilitate their efforts of human rights due diligence in the future.

<sup>&</sup>lt;sup>1</sup> Human rights due diligence encompasses process for (1) identifying and assessing any actual or potential adverse human rights impacts, (2) integrating the findings from their impact assessments and take appropriate action, (3) tracking the effectiveness of their response, and (4) communicating how they address their human rights impacts.

<sup>&</sup>lt;sup>2</sup> Refer to: Human Rights Council, 2011, Report of the Special Representative of the Secretary-General on the issue of human rights and transnational corporations and other business enterprises, Available at:

## 1-2. An overview of the Workshops for Identifying Human Rights Issues

In order to assist companies in implementing human rights due diligence in line with the UN Guiding Principles, the Consortium conducts discussions to identify sector specific human rights issues. An overview of the past workshops is explained below.

In 2012, sector specific human rights issues were identified based on UNEP FI Human Rights Guidance Tool<sup>3</sup>. The final report "Human Rights Issues by Sector (2013)" was released.

In 2013, the workshop explored sector specific human rights issues from the perspective of value chain. The workshop was very useful for the participants in understanding how each human rights issue was linked to activities of different departments throughout value chain. The final report "Human Rights Issues by Sector (v.2)" was released in 2013.

In 2014, the workshop was planned and conducted in order to respond to public comments received in 2013 indicating that "companies need to understand the particular context in which human rights issues arise". First, the participants examined 31 Global Risks outlined in the World Economic Forum Report<sup>4</sup> and then identified 16 Global Risks which were considered to give the greatest influence on the sectors they belonged to. Followed after this process, they explored and identified the interconnectivities between global risks and human rights. This identification was useful for them in understanding how social and environmental issues were dynamically interconnected, and in understanding the particular contexts in which human rights issues arose. The final report "Human Rights Issues by Sector (v.3)" was released.

In 2015, the workshop consisted of the two sessions. In the first session, the participants reviewed any points for addition and modification on "Human Rights Issues by Sector (v.2)" using the Human Rights Guidance Tool<sup>5</sup> (2014 revision) developed by UNEP FI. As the main feature of the 2015 workshop, NGOs/NPOs and subject experts addressed emerging human rights issues in Japan covering sexual minorities, the empowerment of women and technical intern trainees. In addition, the workshop was scaled up from 9 sectors in 2014 to 11 sectors in 2015, discussing and identifying sector specific human rights issues accordingly. The final report "Human Rights Issues by Sector (v.4)" was released. In the second session, a draft "Food Vision" for the 2020 Tokyo Olympics and Paralympics<sup>6</sup> was released on the basis of a series of workshops that brought together companies mainly from the Food sector, NGOs and other stakeholders.

<sup>&</sup>lt;sup>4</sup> <u>http://www3.weforum.org/docs/WEF\_GlobalRisks\_Report\_2014.pdf</u> (Accessed on August, 08, 2014)

<sup>&</sup>lt;sup>5</sup> <u>http://www.unepfi.org/humanrightstoolkit/</u> (Accessed on July 10<sup>th</sup>, 2015)

<sup>&</sup>lt;sup>6</sup> <u>http://crt-japan.jp/files2014/2-4-0-</u>

olympic2020/pdf/Food%20Vision%20for%20the%20Tokyo%202020%20Olympic%20Games.pdf (Japanese only), (Accessed on November 7<sup>th</sup>, 2017)

In 2016, the workshop addressed the relevance between the SDGs and human rights issues. The year of 2015 marked the following four significant events: Firstly, at the G7 Summit in Schloss Elmau Germany, G7 leaders pledged to promote responsible supply chains, and strongly supported the UN Guiding Principles on Business and Human Rights. They also stressed the need to develop substantive National Action Plans and strengthen grievance mechanisms. Secondly, at a Session of the United Nations General Assembly in September, the SDGs were adopted. Thirdly, In the UK, the Modern Slavery Act was adopted. And finally, at the UN Climate Conference in Paris COP 21 in December, the Paris Agreement was adopted which will come into effect in 2020. Considering all of these events, the participants identified sector specific human rights issues with the use of Human Rights Guidance Tool developed by UNEP FI, and they identified priorities on the SDGs by sector with the use of the SDG Compass<sup>7</sup> whilst considering the SDGs and proposals for the SDGs submitted by NGOs/NPOs at the G7 Ise-Shima Summit. The final report "Human Rights Issues by Sector (v.5)" and "Priorities on the SDGs by sector" was released.

In 2017, the participants reviewed any points for addition and modification on "Human Rights Issues by Sector (v.5)" using the Human Rights Guidance Tool<sup>8</sup> (2014 revision) developed by UNEP FI. This year's workshop was implemented to help companies recognize human rights issues particular to Japan, human rights issues in supply chains in Asia, and trends of institutional investors in Japan. Compared to the composition of corporate participants last year, there were more corporate participants from the consumer goods sector and food sector, whereas there were less corporate participants from the manufacturing sector and infrastructure sector. Also, there were more participants from the human resource department and procurement department. Lastly, over 70% of the participants were new to the workshop. The final report "Human Rights Issues by Sector (v.6)" was released.

In 2018, given the raised concerns from NGOs/NPOs, the participants reviewed any points for addition and modification on "Human Rights Issues by Sector " formulated by the CSR Consortium last year, using the Human Rights Guidance Tool<sup>9</sup> (2014 revision) developed by UNEP FI. As a feature of the workshop, NGOs/NPOs raised globally increasing concerns such as marine plastic pollution, SOGI (sexual orientation/gender identification), and the Technical Intern Training Program in Japan. Also, the subject experts shared the trends of Japanese institutional investors. In regard to the composition of the corporate participants, the participation from the chemical and building materials sector, consumer goods sector, and food sector increased significantly from the previous year. In addition, the companies in the pharmaceutical, printing and consulting sectors, which did not identify sector specific human rights issues in the previous year, participated in the workshop. On the other hand, the companies from the manufacturing and transport sectors did not participant in the workshop this year. The final report "Human Rights Issues by Sector (v.7)" was released.

In 2019, given the raised concerns from NGOs/NPOs, the participants reviewed any points for addition and

<sup>&</sup>lt;sup>7</sup> <u>http://sdgcompass.org</u>/ (Accessed on August 15th, 2016)

<sup>&</sup>lt;sup>8</sup> http://www.unepfi.org/humanrightstoolkit/ (Accessed on July 10<sup>th</sup>, 2015)

<sup>&</sup>lt;sup>9</sup> <u>http://www.unepfi.org/humanrightstoolkit/</u> (Accessed on July 10<sup>th</sup>, 2015)

modification on "Human Rights Issues by Sector " formulated by the CSR Consortium last year, using the Human Rights Guidance Tool<sup>10</sup> (2014 revision) developed by UNEP FI. As a feature of the workshop, NGOs/NPOs raised globally increasing concerns such as AI and human rights, AI and privacy, relationships between climate change and human rights, foreign workers in Japan, grievance mechanism, and SDGs and human rights. In regard to the composition of the corporate participants, the participation from the chemical and building materials sector, consumer goods sector, and food sector increased significantly from the previous year. The final report "Human Rights Issues by Sector (v.8)" was released.

In 2020, given the raised concerns from NGOs/NPOs, the participants reviewed the sector specific human rights issues formulated by the CSR Consortium last year as to whether there were any additions/deletions/correction points. This year, due to the impact of Covid-19, this workshop, which was originally held from May to July, was postponed twice. In the end, we planned and implemented an online workshop using the Zoom system from August to November. At the beginning of the workshop, the secretariat and participants made some mistakes and were confused about how to operate the Zoom system. However, they accumulated know-how on Zoom methods as they experienced the workshop. In the half of the workshop, face-to-face meetings with adequate infection control measures were also incorporated, and the workshop was conducted in a hybrid format combining both online and face-to-face meetings. Many of the participants were working from home for infection control measures, and the workshop truly reflected the current work style. The final report "Human Rights Issues by Sector (v.9)" was released.

As the outcomes of the workshop this year, "Human Rights Issues by Sector (v.9)" and "Summary of the cross-industry meeting for corporate participants" (attachment 1) were formulated.

<sup>&</sup>lt;sup>10</sup> <u>http://www.unepfi.org/humanrightstoolkit/</u> (Accessed on July 10<sup>th</sup>, 2015)

## 1-3. Implementation Steps of the 2020 Workshop

The Workshop consists of the following four steps.

Step1: Understanding the context in which human rights issues arise

• Corporate participants were given a lecture on the particular context in which human rights issues arise by members of NGOs/NPOs and subject experts. After the lecture, the participants from the company, NGO/NPO, and subject experts were separated by the given topics and discussed further.

Step2: Reviewing and identifying adverse human rights impacts arising from corporate activities

• The participants reviewed the sector specific human rights issues formulated by the CSR Consortium last year as to whether there were any additions/deletions/correction points, using the Human Rights Guidance Tool (2014 revision).

Step3: Integrating perspectives from both corporations and stakeholders

• The corporate participants summarised discussion contents and exchanged their views with NGOs/NPOs and subject experts. After receiving feedback from the NGOs/NPOs and subject experts, the corporate participants finalized their discussion contents by sector. The Secretariat then compiled their work and developed "Human Rights Issues by Sector (draft)".

Step4: Collecting Public Comments and finalizing our report

The Secretariat opened public comments on this paper from 28th December 2020 – 29th January 2021 (Japan Time). The Secretariat opened the draft document for public comment from Monday 28<sup>th</sup> October 2020 to Friday 29<sup>th</sup> January 2021 (Japan time). Based on the discussions among participants, NGOs/NPOs, and experts, and reflecting the opinions of the public comments, "Human Rights Issues by Sector (v.9)" was developed and released.

## 1-4. Notes for this document

### 1-4.a Relevance between business operations and human rights

In the beginning of this workshop in 2012, NGOs/NPOs did not have full understanding on how their social and environmental concerns were relevant to business and human rights. Also, corporate participants did not understand how their business operations and human rights were relevant. However, through this workshop, they have started recognizing that social and environmental issues are business and human rights, and business operations and human rights are relevant.

## 1-4.b Scope of Study and Analysis

The workshop of this year does not include the following study and analysis.

- The interconnection map of WEF Global Risks illustrated in "Human Rights Issues by Sector (v.3)" is not discussed or in the scope of analysis.
- "Priorities on the SDGs by Sector" discussed at the fifth workshop is not discussed or in the scope of analysis.

#### 2 CRT Japan's viewpoint as the Secretariat of Nippon CSR Consortium

In recent years, there have been increasing calls for companies to fulfill their responsibility to respect human rights. The Guiding Principles on Business and Human Rights, adopted by the United Nations Human Rights Council in 2011, require states to develop national action plans, and calls on companies, regardless of size or industry, to develop and implement human rights due diligence which identifies, assesses, prevents, mitigates, addresses, and discloses negative human rights impacts of their business activities. In addition, in achieving the Sustainable Development Goals (SDGs), companies are positioned as an important implementing entity, and are expected to maximize the positive impact and minimize the negative impact of their activities. Against this background, on October 16, 2020, the Ministry of Foreign Affairs in Japan released an action plan on business and human rights. From now on, it is expected that this plan will contribute to the achievement of the SDGs by encouraging companies to promote a respect for human rights while ensuring policy consistency among the relevant ministries and agencies in Japan.

One of the major events in 2020 is the outbreak of a pandemic new coronavirus infection (Covid-19). A pneumonia of unknown etiology (unknown cause) detected in Wuhan City, China quickly spread to all around the world. Countries around the world have introduced emergency declarations, strict lockdowns, and entry restrictions to contain the spread of Covid-19. As a result, the movement of people and goods stagnated and economic activities were greatly curtailed, which had a significant impact on businesses. In the manufacturing industry, amid sluggish demand due to trade friction between the U.S. and China, there have been a series of plant closures and downsizing due to the impact of Covid-19, and there has been an increase in the number of layoffs and suspensions of employment of foreign workers and non-regular workers who are in unstable labor contract positions. With regard to the supply chain, workers have been subjected to wage payment delays and stay-at-home orders or dismissals due to order cancellations and payment delays by business partners. On the other hand, demand is increasing in industries related to social infrastructure. However, the rapid increase in production and orders are causing overwork and mental health problems. In addition, it becomes an issue on how to ensure the prevention of infection of Covid-19 in departments where it is difficult to work from home. In addition, there is a risk that people in socially vulnerable positions who are already facing human rights issues such as forced labor and child labor will face even more serious human rights issues. Under the growing negative impact on human rights, companies are encouraged to make continuous efforts to mitigate the negative impact on human rights of their stakeholders to the extent possible.

Covid-19 is a challenge to see how humanity can build a global safety net. Currently, while vaccine development is reaching its climax at drug manufacturers and research institutes around the world, developed countries are securing vaccines in advance. Vaccination has started in some countries such as the United Kingdom. However, developing countries are lagging behind in securing vaccines, and there are growing concerns that the disparity between the northern and southern will worsen. Out of concern that developing countries will be left behind, WHO has established an international framework (COVAX Facility) with a public-private partnership to jointly purchase Covid-19 vaccines and distribute them to developing countries, and is calling on countries to join the COVAX Facility. The challenge is how to distribute vaccines to the

Caux Round Table Japan Shibuya Sanshin Mansion 505, 29-33 Sakuragaoka-cho, Shibuya-ku, Tokyo, 150-0031, JAPAN TEL: +81-3-5728-6365 FAX: +81-3-5728-6366 http://crt-japan.jp/en/ socially vulnerable (those who are left behind) to ensure equitable access. WHO has warned that the slackening of infectious disease control measures due to excessive expectations for vaccines will prolong the complete control of Covid-19 infection. We are now faced with the challenge of shifting to a New Normal lifestyle, not "after corona" but "with corona". Extension of conventional economic activities is not the answer.

## 2. Impact of COVID-19 to one's company and supply chain CAUX ROUND TABLE

The purpose of this workshop is to support companies in taking the first step towards conducting human rights due diligence. Individual companies, in cooperation with their stakeholders, are encouraged to use their expertise and strategy to address the human rights issues, and ensure legitimacy through accountability and transparency. By doing so, they will be able to obtain a license to operate from society and ensure the sustainability of their business. The question is how the corporate participants in this workshop can incorporate the outcomes of this workshop into their corporate management and utilize them for their human rights initiatives.

## 3. "Human Rights Issues by Sector"

## **3.1 Manufacturing Sector**

#### Key value chains in manufacturing sector

## **3.6 Logistics and Transport Sector**

#### Key value chains in logistics

Create: research, development Buy: capital investment, procurement of ships, vehicles, aircrafts, and fuel Sell: promotion, sales Transport: operation (storage, logistics, transportation) Dispose: disposal, recycle

Transport. Operation (storage, togistics, transportati					Val	ue C	Chain		
Key human rights issues in logistics and transport sector			Concrete issues	Create	Buy	Sell	Transport	Dispose	
		Working hours	<ul> <li>Logistics and transport industries are a labour-intensive industry. Though it is anticipated that mechanization will be further advanced in the future, laborious work of human beings will still remain.</li> <li>Due to the volume of orders, long-term employment can not be made and employees may be exposed to unstable employment forms.</li> <li>Long working hours at sites and subcontracting companies may occur, especially in busy seasons.</li> <li>Long working hours may occur due to work at late night and early morning to cope with time difference with other countries.</li> <li>Because this industry has a high public nature, unexpected long working hours may occur when disasters occur.</li> </ul>	レ	V	レ	ン		
		Low wages	<ul> <li>Low wages maynot meet the living standard for workers and their families.</li> <li>Working hours may get longer due to expansion of mail-order markets, wages per unit of time may decrease.</li> <li>The pandemic affected distribution volume and overal business volume, resulting in failure to obtain stable income. At the site of the logistics and transport industry, there is always dangerous work such as loading and unloading heavy objects,</li> </ul>	レ	レ	レ	レ		
Core operation/ Supply chain	Workplace conditions	Health and safety	<ul> <li>transportation, the use of large machinery/vehicles, and working in proximity to trains, aircrafts and ships. It is important to make daily efforts to prevent risks from occurring, in order to keep workplaces safe.</li> <li>Occupational accidents may occur when handling heavy machinery or heavy cargoes at shipping vessels, terminals, airplanes and airports.</li> <li>Securing workers' safety in areas of piracy occurrence and regions with geopolitical risks, such as the Straits of Holmes. [shipping business]</li> <li>As this industry has a high public nature, there is a possibility of secondary damage of occupational accidents when disaster occurs</li> <li>Long working hours may cause mental health risks.</li> <li>Potential risks of causing forced and child labour, and threatening the health and safety (other than employees) in supply chains.</li> <li>Working remotely may adversely impact on employees' mental health (signs of declining mental health may not be easily recognized)</li> <li>The difficulties around transit and crew change may cause longer time stay at sea and trigger mental issues.</li> <li>In the workplace where it is difficult to work from home, there is a risk of infection due to inadequate measures against infectious diseases including coronavirus</li> </ul>		V	レ	ン	L	
	Discrimination	Employment Environment and Requirement	In anticipation of the shortage of human resources due to the declining population, in recent years, human resources and forms of employment have been diversified such as employment of temporary staff, senior employees, foreign employees, the disabled, full employment of contract employees, and implementation of short work and teleworking. • There may be unequal treatment in working conditions, training and promotion as various types of human resources are employed under various types of employment. • Foreigners may be treated unfairly in employment and treatment. (They are more likely to experience such unequal treatments under these uncertain times) • There may be uniform treatment to workers without due concern for diversity (SOGI). • Discrimination against people who tested positive for COVID-19.			レ	レ
